Memo to File:

RE: Koosharem Clay Pit
ML-27110 and ML-27206
Piute County, Utah
ACT/031/002

On August 29, 1979, Ron Daniels and Jim Smith inspected this suspended clay operation for the purpose of viewing the status of the temporary reclamation work performed last fall. The success of the seeding was poor with some grasses and annual forbs appearing on the more level areas. Success would probably have been higher if fertilizer would have been added and the slopes and highwalls reduced or eliminated.

Mr. Fullmer will be notified to post the required reclamation bond, estimated to be \$4,548.00, with the Division of State Lands with the stipulation that total reclamation take place if operations are not resumed within two years.
